1. NATURE OF OPERATIONS AND GOING CONCERN

Pan Global Resources Inc. (hereafter referred to as the "Company") is incorporated under the laws of the Province of British Columbia and was established as a legal entity on February 1, 2006. On December 21, 2009, the Company changed its name from Mosam Capital Corp. to Pan Global Resources Inc.

The Company's principal business activities are the acquisition of rights to explore for minerals and the exploration of acquired rights. The Company's held mineral interests located in the Republic of Serbia but has returned the licenses and is currently seeking a suitable project. The Company's continuing operations and the ability of the Company to meet its commitments are dependent upon the ability of the Company to find a suitable project and to raise additional equity and debt financing.

The Company's common shares are listed on the TSX Venture Exchange ("TSX-V") under the trading symbol "PGZ". The Company's principal office is located at 700 – 1199 West Hastings Street, Vancouver, British Columbia, V6E 3T5.

These financial statements are prepared on a going concern basis, which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. The ability of the Company to continue as a going concern depends upon its ability to raise adequate financing and develop profitable operations. These financial statements do not include any adjustments to amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue operations. At April 30, 2016, the Company has not achieved profitable operations and has accumulated losses since inception. There is material uncertainty that may cast significant doubt upon the ability of the Company to continue as a going concern. Management is currently looking at several options to move the Company forward and expects to make a final decision in the next few months.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation and measurement

These condensed interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), including International Accounting Standard 34, Interim Financial Reporting ("IAS 34"). These condensed interim financial statements have been prepared on a historical cost basis. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting except for cash flow information.

These condensed interim financial statements follow the same accounting policies and methods of application as our most recent annual financial statements, except as described below, and should be read in conjunction with the annual audited financial statements of the Company for the year ended January 31, 2016.

Accounting pronouncements not yet effective:

IFRS 9 requires financial assets to be classified into three measurement categories on initial recognition: those measured at fair value through profit and loss, those measured at fair value through other comprehensive income and those measured at amortized cost. Measurement and classification of financial assets is dependent on the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial asset. For financial liabilities, the standard retains most of the IAS 39 requirements. The effective date for IFRS 9 is January 1, 2018. The Company is currently evaluating the impact that the final standard is expected to have on its consolidated financial statements.

10. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

None.

11. FINANCIAL INSTRUMENTS, RISK AND CAPITAL MANAGEMENT

Financial Instruments

The Company classified its financial instruments as follows:

As at April 30, 2016	Financial Instruments at FVTPL	Loans and Receivables	Other Financial Liabilities
Cash	\$ 4,020	\$ -	\$ -
Receivables	-	21,121	-
Accounts payable and accrued liabilities	-	-	315,167
	\$ 4,020	\$ 21,121	\$ 315,167

Fair Value

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- Level 3 - Inputs for assets and liabilities that are not based on observable market data.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

The carrying value of receivables, and accounts payable and accrued liabilities approximated their fair value because of the short-term nature of these instruments.

As at April 30, 2016, the Company's financial instruments measured at fair value are as follows:

Financial Assets	Level 1	Level 2	Level 3	Total
Cash	\$ 4,020	\$ -	\$ -	\$ 4,020

Risk and Capital Management

The Company's capital includes share capital and the cumulative deficit. The Company's objectives when managing capital are to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. The Company may issue new shares in order to meet its financial obligations. There was no change in the Company's approach to managing capital during the year ended April 30, 2016.

11. FINANCIAL INSTRUMENTS, RISK AND CAPITAL MANAGEMENT (cont'd...)

The Company's activities expose it to a variety of financial risks, market risk (including currency risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Company.

This note presents information about the Company's exposure to each of these risks, the Company's objectives and processes for measuring and managing risk, and the Company's management of capital.

The board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

Credit Risk

Credit risk arises from cash and deposits with banks, as well as credit exposure on outstanding receivables and committed transactions. There is no significant concentration of credit risk. The Company's cash deposits are primarily held with a Canadian chartered bank. The Company has minimal accounts receivable exposure as it relates to amounts due from the Government of Canada pursuant to goods and services tax credits.

Interest rate risk

As the Company does not have significant interest-bearing assets, the Company's income and operating cash flows are not significantly affected by changes in market interest rates.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company has historically relied on the issuance of shares and warrants to fund exploration programs and will require doing so again in the future.

Currency Risk

The Company has identified its functional currency as the Canadian dollar. Certain of the Company's exploration expenditures have been denominated in Serbian Dinar (RSD) and United States dollars (USD). The Company's exposure to foreign currency risk arises primarily on fluctuations between the Canadian dollar and those two currencies. The Company has not entered into any derivative instruments to manage foreign exchange fluctuations. Management believes the foreign exchange risk related to currency conversions is minimal.
